

GHOSTCORE SYSTEMS - BLACKFILE

Designation: WRAITHHALO

System Classification: Electromagnetic Cloak Dome + EMP Disruption Pulse

Codename: WraithHalo

Operational Role: Battlefield blackout, mass stealth cover, electronic disruption

Tactical Use:

- Deploys as a 5km-radius dome of cloaked EM interference
- Overloads sensors within radius while veiling everything inside from external scans
- Designed for high-value swarm deployments, GhostFleet retreats, or orbital infiltration staging

Pulse Signature:

- 2 millisecond pre-detonation EM resonance
- Post-burst phase distortion mimics cosmic static

Behavioral Pattern:

- Active for 10 seconds
- Cooldown enforced for 90 seconds between pulses
- Can be layered with Spectre Field Denier or WraithSkin modules

Symbolism:

Named for the invisible halo left behind by unseen saints - it surrounds, protects, and blinds all who witness.

Outcome:

When the WraithHalo falls, the world outside loses sight - and the ghosts within choose who walks out.
