

GHOSTCORE SYSTEMS - BLACKFILE

Designation: HALO ARRAY

System Classification: Perimeter Photon Pulse Ring

Codename: Halo Array

Operational Role: Anti-fighter Defense / Perimeter Suppression / Photon-Based Area Control

Strategic Use:

- Emits photon pulses in a rotating ring or sector pattern
- Disables incoming fighter-class craft, missiles, and drones
- Offers full 360° coverage or focused 45° engagement arcs

Deployment:

- Mounted on GhostStar perimeter bands, drone shells, or planetary turrets
- Automatically synced with GhostFleet AI for real-time threat response
- Recharges through PhotonCore discharge regulation between cycles

Symbolism:

The Halo is not just a ring of light - it's the first line of judgment.

Anything that enters without permission is already gone.

Outcome:

Incoming swarm? Gone.

Missile wave? Disintegrated.

Fighter wings? Never saw the ring light.
