

WEAPON SYSTEM: ELYSIUM BLOOM

TYPE: DRX-Payload Cluster Ordinance

ROLE: Deep-strike Dispersal Munition

DESCRIPTION:

Modular kinetic drone core utilizing GhostCore micro-reactor technology. Launched via railgun or orbital cannon. Disperses into multi-warhead DRX submunitions, each equipped with spectral logic, stealth skin, and autonomous targeting.

DEPLOYMENT:

- Mid-flight fracture point calculated pre-launch or triggered via GhostNode command
- Each DRX unit contains selective payload profiles (EMP, plasma, recon, kinetic)
- Can remain dormant in target system for up to 7 years

STRATEGIC ROLE:

- Area denial
- Long-duration fleet interdiction
- Orbital decoy sweep and misdirection

SYSTEM: GHOST SWARM CARRIER (Codename: "Divine Chorus")

TYPE: Unmanned Drone Deployment Platform

ROLE: Wide-scale psychological and electronic dominance

DESCRIPTION:

Orbital drop-capable swarm unit delivering >30,000 mixed drone types in target

AO. Operates independently or as a trailing unit behind WraithStrike-class precision attacks.

DRONE CONFIGURATIONS:

- WRAITHBOLT: Precision strike / high-value elimination
- SHADE: Combat dominance & environmental cleansing
- PHANTOM: Signal denial / stealth recon
- SPECTRE: Advanced surveillance / targeting acquisition

DEPLOYMENT TACTIC:

1. Target AO is isolated by spectral jamming & comms blackout
2. WRAITHBOLTS eliminate command & anti-air structures
3. SHADE swarm deploys across 4-grid killbox with suppression protocols
4. SPECTRE & PHANTOM maintain long-term overwatch & tracking
5. GHOSTNODE requests surrender broadcast - optional

NOTE: Psychological effect measured at 93% collapse rate within 8 hours of engagement.
