

GHOSTCORE SYSTEMS - BLACKFILE

Designation: EDEN SHARD

System Classification: Crystal-Resonant Photon Repeater

Codename: Eden Shard

Operational Role: Mid-Range Auto-Pulse Assault / Precision Anti-Fighter Tool

Strategic Use:

- Fires a rapid burst of focused photon pulses using crystal oscillation modulation
- Capable of piercing tactical hulls, sensor nodes, and internal power cores
- Designed for elegant suppression, not brute annihilation

Deployment:

- Used on spinal cores, crystal-focused defense platforms, or photon-winged drones
- Syncs with Seraph's Mirror for light curve deflection into obscured targets
- Capable of "blade pulse" behavior - slight time-flicker to fool reactive shielding

Symbolism:

Each shard is a piece of Eden - pure, radiant, precise.

Beauty, when weaponized, becomes undeniable.

Outcome:

The light hums.

The air cracks.

The target's heart is pierced before it even knows it's been touched.
