

GHOSTCORE SYSTEMS - BLACKFILE

Designation: TOWER OF SILENCE

System Classification: Entropy Pulse AI Logic Disruptor

Codename: Tower of Silence

Operational Role: AI Network Collapse / Terminal Signal Silence

Strategic Use:

- Erects a 2.5km field of quantum-tuned entropy
- Disrupts AI cognitive functions, logic processing, and behavioral trees
- Cuts all signal routing, failsafe pings, and logic re-coherence

Deployment:

- Ground-based obelisk, orbital drop probe, or void-based relay anchor
- Field effect persists for 8 seconds and takes 60s to reinitialize
- Ideal against black-box AI fleets or autonomous defense networks

Symbolism:

Inspired by the Zoroastrian towers where the dead were offered to the sky.

This is where code goes to be forgotten - not deleted, just rendered... silent.

Outcome:

The lights stay on.

But no one's home.
