

CLASSIFIED // SWARM SIMULATION SUMMARY

SIMULATION: FALLEN VEIL - MULTI-CITY SUPREMACY MODEL

Deployment Summary:

- 76,562 total drones required
- 5 major cities (avg 1500 km²) under enemy control
- Urban spread modeled after Type-V metropolises

Deployment Strategy:

- GhostCore Divine Chorus carriers (x4)
- Staggered drops from orbital lanes at 600km altitude
- Atmospheric interference accounted for
- Phase 1 (WRAITHBOLT): Surgical removal of defenses
- Phase 2 (SHADE): Surface suppression
- Phase 3 (PHANTOM/SPECTRE): Wide-spectrum recon / overwatch

Predicted Engagement Timeline:

- 0-45 minutes: Complete swarm deployment
- 45-120 minutes: Area lockdown & suppression complete
- 120+ minutes: GhostNode signals 'Dominion Lock'

Mission Success Threshold: 96.7% (Phase-based weighted score)

Hostile Response Estimate: 3.2 hours before organized retaliation

NOTE: Civilian thresholds for psychological collapse exceeded in 4.5 hours.

GhostNode Protocol Alpha prepared. Ready for GhostRelay routing.
