

GHOSTCORE SYSTEMS - BLACKFILE

Designation: ECHO FANG ARRAY

System Classification: Quantum Signal Disruption Array

Codename: Echo Fang Array

Operational Role: AI Command Corruption / Neural Signal Sabotage

Tactical Use:

- Projects wave-based logic disruption across linked AI systems
- Specifically fractures decision trees and targeting cohesion
- Operates in reverb bursts to create predictive error trails

Deployment Patterns:

- Deployed from orbital drones or rotating stealth corvettes
- Uses variable frequency scrambling tuned to neural pattern chatter
- Can be combined with EMP or Golgotha's Dart for staggered annihilation

Symbolism:

The Echo Fang is not a blade - it's the ripple of a scream between circuits.

AI doesn't die. It forgets how to think - and fails in silence.

Outcome:

Neural targeting collapses.

Swarm logic turns erratic.

And in that chaos - we strike.
