

# GHOSTCORE SYSTEMS - BLACKFILE

## Designation: THORNS OF ENOCH

System Classification: Plasma Microdart Swarm Saturation Weapon

Codename: Thorns of Enoch

Operational Role: Shield Saturation / Hull Penetration / Internal Devastation

---

Tactical Use:

- Launches 72 microdarts in a spiral chaos swarm pattern
- Each dart carries a needle-thin plasma edge and kinetic spike
- Overwhelms shield timing and auto-defense systems through unpredictability

Deployment:

- Released from drone hives, mechs, or orbital dispersal systems
- Coordinated burst pattern enables flexible zone coverage
- Designed to follow up GhostRail or Abaddon's Harrow strikes

Symbolism:

Enoch, the prophet who walked with God and vanished - left only thorns behind.

This is the swarm they never saw, but always feared.

Outcome:

Shields collapse. Hulls bleed. AI screams into static.

And the swarm keeps dancing.
