GHOSTCORE SYSTEMS - BLACKFILE

Designation: GOD'S BLIND SPOT

System Classification: Electromagnetic Spectral Field Denier

Codename: God's Blind Spot

Operational Role: Sensor Disruption / Scan Interference / Cloak Reinforcement

---

Strategic Use:

- Generates localized electromagnetic inversion field

- Causes enemy sensor returns to appear as voids or empty space

- Randomizes telemetry response to confuse targeting algorithms

Behavioral Signature:

- Activates in pulses lasting 2-4 seconds

- EM emissions mimic natural cosmic background to avoid pattern flagging

- System tap draws minimal reactor power, safe for cloaked deployment

Symbolic Context:

Named after the myth that even omniscience has a blind spot. In that moment, under WraithSkin and this veil, the GhostFleet is untouchable.

Doctrine:

Use during approach or post-strike evasion. Avoid stacking with EMP unless targeting a hard AI system. Should be synchronized via HiveAI for optimal overlapping bursts.

Outcome:

You aren't just invisible - you've been erased from probability itself.
